

A boat made from recycled trash, called...

"FLUKE"

...will travel 300 miles down the California coast to raise awareness about plastic debris on our streets, beaches, in our wetlands and filling our oceans.

The Algalita Marine Research Foundation, in cooperation with the Environmental Charter High School, built FLUKE with:

- 700 plastic bottles
- 1000 plastic bags
- A junk car seat
- A sail made from 50 polyester shirts

Launch Date: May 1, 2006

Visit: www.algalita.org for more details.

Supported by the

California Coastal Commission's
Whale Tail License Plate Grants Program
